Release 1.1.5

Williams Méndez

June 08, 2015

1	Installing	1
2	Usage	3

Installing

Install **django-realestate** with `pip install -e git+https://github.com/wm3ndez/realestate.git#egg=reale`

Usage

Add the need apps to INSTALLED_APPS:

```
INSTALLED_APPS = (  
    # other apps  
  
    'realestate',  
    'realestate.listing',  
    'realestate.home',  
  
    #django-constance  
    'constance',  
    # see django-constance documentation  
    'constance.backends.database',  
)
```

Add the url patterns:

```
url('^', include('realestate.urls'))
```

Configure Constance:

```
CONSTANCE_CONFIG = {  
    'PROPERTIES_PER_PAGE': (16, _('Properties per page')),  
    'RECENTLY_ADDED': (6, _('Recently Added')),  
    'CONTACT_DEFAULT_EMAIL': (ADMINS[0][0], _('Contact form email'))  
}
```

Assuming that you are storing Constance values in the Database:

```
CONSTANCE_BACKEND = 'constance.backends.database.DatabaseBackend'
```
